In the Claims:

- 1.(original) A moist wipe for cleaning a wooden surface, the wipe comprising a sheet material pre-moistened with a liquid composition, being an aqueous emulsion comprising from 0.1 to 5% of a paraffin wax, no silicone compounds or silicone compounds in an amount of less than 0.5% and water in an amount of 50% to 98% in each case by weight of the total weight of the liquid composition.
- 2.(original) A moist wipe as claimed in claim 1 wherein the wax is present in the composition in an amount of between 0.1% to 3% by weight of the total weight of the liquid composition.
- 3.(currently amended) A moist wipe <u>according to claim 1</u> as claimed in any preceding claim wherein the liquid composition includes, as a carrier and/or a cleaner, an aliphatic C₁ to C₄ alcohol.
- 4.(currently amended) A moist wipe <u>according to claim 1</u> as claimed in any preceding claim wherein the sheet material comprises a porous, absorbent, non-woven fibrous material.
- 5.(currently amended) A moist wipe <u>according to claim 1</u> as claimed in any preceding claim wherein the loading of the liquid composition on the wipe is in the range of 30 to 150 <u>grams/cm² gm⁻²</u>.
- 6.(currently amended) A packaged product comprising a substantially airtight container having a resealable opening and a wipe according to claim 1 as claimed in any preceding claim.
- 7.(currently amended) Use of a wipe <u>according to claim 1</u> as claimed in any of claims 1 to 5 for cleaning a surface.

US Serial No. 35 USC 371 of PCT/GB2003/02653 Page 3 of 4

8.(currently amended) A method of manufacturing a wipe <u>according to claim</u>

1 as claimed in any of claims 1 to 5, the method comprising the steps of providing a sheet material and moistening the sheet material with the liquid composition.

9. (currently amended) A method <u>according to</u> <u>as claimed in claim 8 wherein</u> a supply roll of sheet material is unwound to provide a continuously moving web of material.

10.(currently amended) A method <u>according to</u> <u>as claimed in claim 9 wherein</u> the web of material is slit to form perforated tear zones, or individual wipes in the form of a stack.

11.(canceled)
